

triobike taxi rear drive

The Triobike taxi is for transporting elderly people who still enjoy the wind in their hair! The bike is a pleasure to ride even when carrying two adults up a hill. And, it's a pleasure to sit in with soft, bespoke cushions. We've even adapted the seat to make it accessible for people with walking difficulties. Once seated, safety is key with a seatbelt per passenger.

The Triobike taxi has a handy storage unit and a retractable hood and waterproof blanket for bad weather. Its many windows ensure a superb all-round view. Carpe diem!

The taxi rear drive is equipped with the super-reliable Promovec e-power system. This motor will get you up hills no problem, even with the pod fully loaded. The electric motor is very powerful and will do the work for you. A long journey is no problem! The motor battery is conveniently stored underneath the rear rack and is as easy to charge as a cell phone. The display let's you keep track of your battery level, distance travelled and speed. And, you can adjust how much help you want from the electric motor. All e-systems provided by Triobike comply with EN 15194 standard.
